Malaysian Journal of Nutrition

Guidelines for submitting manuscripts

The **Malaysian Journal of Nutrition** welcomes manuscripts on all aspects of nutrition in the form of original articles, review articles, case-reports, short communications, book reviews and letters to the Editor. In order to avoid delays in publication, authors are advised to adhere closely to the instructions below.

All materials submitted for publication are assumed to be submitted exclusively to the Malaysian Journal of Nutrition (MJN) unless the contrary is stated.

Manuscripts must be submitted in English (British English). All manuscripts submitted must be original and must be submitted in an electronic format to the Editor (*khlor.geoklin@gmail.com*)

MANUSCRIPT PREPARATION

The manuscript must adhere to the following guidelines before it is considered eligible for review. The manuscript must be arranged as follows: title page, abstract, text, references, tables and figures submitted in one document and not as separate sections.

Manuscripts should be typed on 12-point font Times New Roman, double-spaced with a margin of 2.5 cm on all sides.

The title page should state the title of the manuscript, full first name and surname of each author, authors' departments and institutions, city and country. Also enclose the complete postal address, telephone number, fax number and e-mail address of the author who will be responsible for all correspondences regarding the manuscript.

An abstract not exceeding 250 words in length should be provided on a page of its own. Make sure the title of the manuscript is included in the Abstract page. Do not include names and other details of author(s) on the Abstract page.

The abstract is divided into the following headings: Introduction (purposes of the study), Methods (study design, analytical methods), Results (specific data), and Conclusion (key aspects derived from the study).

Below the abstract, provide and identify five keywords or short phrases that will assist in cross-indexing the article.

Introduction, Results, Discussion, Acknowledgements and References should follow. Total number of words should not exceed 4500 excluding the Abstract and References.

Authors should state the authority which gave ethics approval for the study.

Guidelines for Short Communication

- (a) Total number of words should not exceed 2000
- (b) References should be limited to 10
- (c) No more than a total of two Tables/Figures

Conflicts of Interest

Authors should declare if they have any conflict of interest at the end of the article before References.

Citations and References

It is the authors' responsibility to check all references very carefully for accuracy and completeness. In the text, references are cited by the surname(s) of the author(s) and year of publication parenthetically at the appropriate place. Three authors appear in full on first citation, e.g. Bray, Whipp & Koyal (1994), but subsequently as Bray *et al.* (1994). For four or more authors, indicate the first author followed by *et al.* Total number of references should not exceed 30 except for Review Papers

In the Reference section, list the references in alphabetical order. For each reference, all authors' names should be included. Examples of correct forms of references are given below:

Potential Reviewers

Authors are required to provide 3 suitable reviewers with designations, affiliations and email addresses. All reviewers should not be from any of the authors' own institutions and at least one referee should be from an outside country of the corresponding author. It is at the editor's discretion to use the recommended reviewers.

Tables and Illustrations

Each table should be typed double-spaced on a separate sheet of paper. Tables should be numbered consecutively and should be completely labeled so as to be comprehensible without reference to the text. Omit internal vertical lines.

All illustrations and diagrams should be referred to as figures and numbered consecutively. Each illustration should be on a separate sheet of paper. Submit good quality original or glossy prints for direct reproduction. Photocopies of illustrations are not acceptable.

Arabic numerals should be used when numbering tables and illustrations. Total number of tables and illustrations should not exceed five with the exception of Review Papers

Place Tables and Figures at the end of the text after the References. Please ensure that the tables drawn up can be copyfitted into a page of the journal.

Units and Abbreviations

All measurements should be reported using the metric system. Explain any abbreviations unless immediately obvious.
